

OUR LOCATION

HOW TO REACH US

Interface Financial Planning operates from a private detached house in the green and leafy environment of Handsworth Wood. Two rooms are dedicated to the business and you will find a relaxed and comfortable meeting room. At one time we had an office near to the Town Hall in Birmingham City Centre, but we found that clients did not like travelling into Birmingham and parking was difficult and expensive. They find the relaxed atmosphere of our current meeting space much more satisfactory and there is ample free parking.

We have embraced technology to provide the efficiencies of modern working and our business is entirely cloud based with all client data stored securely in the cloud and none held locally. All support staff work remotely from various locations around the UK (and beyond), and these arrangements enable us to keep our fees low. In addition, our low overhead base enables us to advise clients who have lower levels of investments which many IFAs who operate from expensive city centre offices could not afford to do.
